
Teacher Attrition Data and Analysis

Ideally, a discussion of a housing allocation or other cost of living differential in Washington would include documentation of the extent to which disparities in purchasing power account for higher turnover or more difficulty in recruiting educators in the higher cost areas of the state. Unfortunately, there is insufficient data and analysis available to link housing cost differences with above average teacher attrition in high cost areas. Significant research is needed to gain an understanding of educator attrition trends both statewide and by geographic area, and to document the degree to which different factors impact these trends. There is anecdotal evidence of teacher recruitment and retention challenges in areas of the state with both high and low housing costs.

Using available job turnover data from the state Employment Security Department a strong correlation between high housing costs and teacher turnover could not be documented. It is difficult to draw a firm conclusion from these data because they include all K-12 personnel and cover only two years of experience.

A database could be developed to identify for disparities between districts, especially economic differences. The data base could be used to correlate the disparities with district' s retention and turnover experience over a longer period of time

OTHER OPTIONS

This study has focused primarily on the possible use of a housing cost allowance to mitigate cost of living differences among areas and regions of the state. Other possible options for addressing this issue include:

1. Signing bonuses for new teachers in qualifying districts to help pay the down payment on a house.
2. Low-interest loans or mortgage subsidies mortgages for teachers in qualified school districts.
3. Increasing local levy authority in qualifying school districts to allow those school districts to ask taxpayers for more money to fund pay raises to mitigate cost of living differences.
4. Allow qualifying school districts to use capital bond proceeds to buy down mortgages.
5. Change Time Responsibility Incentive (TRI) days to authorize signing bonuses or housing allowances under “ incentive.”
