

## Contractor Project #2

### Part 1

Review of current sex and kidnapping offender risk level assignment/re-assignment evaluation standards (related to all offenders, including those not in treatment and not on supervision)

- County's process:
  - o What is the current process for evaluating a sex or kidnapping offender's risk classification level?
  - o When is an evaluation completed?
  - o What tools and criteria are used in the evaluation?
  - o How many evaluations are completed per year per evaluator?
  - o Who has the final decision on the risk level?
  - o Is there a different process used for juvenile and adult offenders? What is the difference?
- Training:
  - o Who performs the evaluation?
  - o What is the evaluator's experience/education?
  - o What evaluation training is required/offered by the county?
  - o Is on-going training offered? How frequently?
  - o If using the Static 99R:
    - Has the evaluator received formal certification in the use of the instrument?
    - What policies or practices are utilized to maintain quality control and fidelity to the Static 99R coding manual?
    - What population is assessed using the Static 99R? Are there any exceptions?
- Is there an appeal process? What is that process?

## Part 2

Review of the literature and research related to sex and kidnapping offender risk classification and risk evaluations

- Criteria:
  - o What criteria are research-based?
  - o Dynamic criteria considerations?
  - o Criteria related to initial evaluations vs criteria related to subsequent evaluations?
  - o Are there differences between adult and juvenile offenders?
- Evaluations:
  - o Recommendations regarding evaluator experience/education?
  - o Recommendations regarding evaluator training?
  - o Completing evaluations: Local evaluators vs one dedicated entity
  - o Are there certain timing parameters that have been tested and found successful?
  - o Are there differences between juvenile and adult offenders?
