

85.85 Liabilities and Equity - Illustrative Entries

85.85.10

July 1, 2003

General

The entries in this section illustrate the recording of liabilities and equity in the accounting records. The entries are for illustrative purposes **only** and should **not** be considered all-inclusive. Entries posted to GL Code Series 71XX "In-Process" in treasury and treasury trust accounts also require an entry from the Office of the State Treasurer (OST) as illustrated below to clear the In-Process GL Codes.

	Dr.	Cr.
In-Process (71XX)	xxx	
Current Treasury Cash Activity (OST Only) (4310)		Xxx

The entry would be reversed for In-Process debit amounts.

Fund bond debt issuance and servicing

The following example is used to illustrate entries for recording the issuance and servicing of fund bond debt in a non-appropriated proprietary account. Generally, these bonds are revenue bonds. Refer to Subsection 85.72.20.c.)

An agency issues revenue bonds with:

- Par amount of \$5,000,
- Original issue discount (OID) of \$200,
- Underwriter's discount (UD) of \$60
- Costs of issuance (COI) of \$20.

Note: Discounts that are related to underwriters' fees are handled consistent with other issue costs. OID results when the par of the bond exceeds its purchase price. Original Issue Premium, OIP, results when the par of the bond is less than the purchase price. Costs of issuance are generally included in the proceeds and paid separately. The issue is to be repaid in equal installments over 10 years, beginning next year. Interest is payable at 6% per year on the outstanding balance. If bond issue costs are deemed immaterial, they may be expensed through GL Code 6510 "Cash Expenditures/Expenses," Subobject PC "Other Debt Services."

Note: If this were a **budgeted proprietary account**, bond proceeds would be recorded as revenue by a credit to GL Code 3210 “Cash Revenues,” Revenue Source Code 0860 “Bonds Issued,” and then adjusted for GAAP reporting purposes through GL Code 3225 “Revenue Adjustments/ Eliminations (GAAP),” Revenue Source Code 0860 to GL Code 5162 “Revenue Bonds Payable.” Likewise, payments on bond principal would be initially recorded as expenditure by a debit to GL Code 6510 Subobject PA “Principal,” and then adjusted for GAAP reporting purposes through GL Code 6525 “Expense Adjustments/Eliminations (GAAP),” Subobject PA to GL Code 5162.

General obligation bond debt issuance and servicing

The following example is used to illustrate entries for recording the issuance and servicing of general obligation bond debt: Bond par value is \$5,000, with original issue premium (OIP) of \$200, underwriter's discount (UD) of \$60, costs of issuance (COI) of \$20, and an interest rate of 6%. First year debt service includes principal of \$500 and interest of \$300. Refer to Subsection 85.72.20.c.

Proceeds of the debt issue will be used to build a facility to house a general governmental agency. For general obligation bond debt handled by the Office of the State Treasurer (OST), the costs of issuance (COI) are always included in the proceeds and paid separately by OST.

85.85.35.a

Lease-purchase agreements (Capital leases)

The following example is used to illustrate the lease purchase entries for capital leases in a governmental fund type account. Refer to Subsection 85.72.30.

An agency operating from the General Fund (governmental fund type account) entered into an agreement to lease a copying machine with a fair value of \$15,000 for 60 months at the rate of \$300 per month. The current interest rate is 12 percent and the present value of the minimum lease payments is \$13,621 (annuity due). Since the present value of the minimum lease payments and the fair value are more than \$10,000, this lease-purchase meets the state's criteria for a capital lease (refer to Subsection 30.20.30 for further information on capitalization criteria for capital leases). The amount to be capitalized is \$13,621, which is the lesser of the fair value and net present value. Therefore, the entries to be recorded for a capital lease are as follows:

Note: Contact the Office of State Treasurer for the current rate of interest, for computing present value. Capital leases are computed as annuities due because the payments are made at the first of the month; other capital purchases may be computed as ordinary annuities.

85.85.40.b

PROPRIETARY AND TRUST FUND TYPE ACCOUNTS

The following example is used to illustrate the lease purchase entries for capital leases in proprietary and trust fund type accounts. Refer to Subsection 85.72.30.

An agency operating from a proprietary fund type account entered into an agreement to lease a copying machine with a fair value of \$15,000 for 60 months at the rate of \$300 per month. The current interest rate is 12 percent and the present value of the minimum lease payments is \$13,621 (annuity due). Since the present value of the minimum lease payments and the fair value are more than \$10,000, this purchase meets the state's criteria for a capital lease. Refer to Subsection 30.20.30 for further information on capitalization criteria for capital leases. The amount to be capitalized is \$13,621, which is the lesser of the fair value and net present value. Therefore, the entries to be recorded in the proprietary fund for the capital lease are as follows:

85.85.40.b.(1)

To record the capital lease-purchase of a capital asset and the lease liability. The asset is recorded at cost, excluding interest, of the asset financed. The current lease liability represents that portion of the lease obligations due within one year and the long-term liability represents lease obligations maturing thereafter.

	Dr.	Cr.
Cash Expenditures/Expenses (6510) Subobject PB - Interest	133	
Lease-Purchase Agreements Payable (5172)	167	
Cash in Bank (1110) or In-Process (71XX)		300

85.85.40.c **COMPUTATION OF PRESENT VALUE ANNUITIES**

Any annuity is a series of equal payments made at regular intervals of time. The time intervals between payments are called payment periods. An annuity is a compound interest situation with periodic payments. When the payments are made at the end of the payment periods, the annuity is called an ordinary annuity. When the payments are made at the beginning of the payment periods, the annuity is called an annuity due.

Computation of present value may be achieved by use of the following formulas:

Where:

Pv = present value factor
I = interest rate
n = number of periods

Ordinary Annuity/Present Value Formula - A loan is a prime example of this annuity situation in which a sum of money is to be repaid with interest by certain payments for a fixed number of periods. The present value of the loan can be computed by multiplying the periodic loan payments by the present value factor. The present value factor is calculated by using the following formula:

$$Pv = \frac{1}{i} \frac{1 - (1+i)^{-n}}{1+i}$$

Annuity Due/Present Value Formula - Rent or lease situations are common examples of this type of annuity. The present value of the rent or lease can be computed by multiplying the periodic rent/lease payments by the present value factor. The present value factor is calculated by using the following formula:

(However, the formula need not be used, since tables showing present values computed with the formula at various interest rates are readily available.)

$$Pv = \frac{1}{i} \frac{1 - (1+i)^{-n-1}}{1+i} \quad \text{and adding 1 to the computed amount}$$

Equipment Certificates of Participation

The following example is used to illustrate entries for **equipment certificates of participation** (COPs) in a **governmental** fund type account. Refer to Subsection 85.72.40.c.

An agency operating in a governmental fund type account purchases a piece of equipment for \$10,000, and finances it through a COP. (The actual par value of the COP is slightly higher to cover issue costs, such as Cost of Issuance (COI), Original Issue Discount (OID) and Underwriter's Discount (UD). The COI is always included in the proceeds received by OST, but not the OID or the UD.

OST recovers the COI, OID, and UD from agencies by factoring these costs into the interest portion of the agency repayment schedule. Refer to Subsection 85.85.45.c. Terms of the COP require first year debt service in the amount of \$2,000 principal and \$600 interest, and a second year principal payment of \$2,200.

While agency entries differ if the equipment is acquired by a governmental or proprietary fund type account, the OST entries are the same.

85.85.45.a **GOVERNMENTAL FUND TYPE ACCOUNTS (Agency Entries)**

85.85.45.a.(1) **To record the COP liability.** When the COP is sold by OST, it becomes an obligation of the agency even if the proceeds have not yet been received by the agency. The time period between the COP sale date and closing date is two weeks or less.

*If OST pays the vendor directly for the equipment, then the agency would not record the cash receipt or the cash disbursement entries (since there is no reimbursement to the agency). However, the agency would still record the capital acquisition in GL 6514 Subobject JC with the credit offset in GL 3221 Revenue Source Code 0807.

Note: If a COP has been authorized and equipment costs are incurred in one fiscal year and the COP is not issued until the subsequent year, agencies should debit a receivable, such as GL Code 1352 "Due from Other Governments," and credit expenditures to GL Code 6510 in the year the equipment costs are initially incurred. When the COP is issued in the subsequent year, the agency should credit the GL Code 1352 and debit cash when the COP proceeds are received, along with a debit to GL Code 6514 Subobject JC with the offsetting credit to GL Code 3221 Revenue Source Code 0807.

PROPRIETARY FUND TYPE ACCOUNTS (Agency Entries)

The following example is used to illustrate entries for **equipment certificates of participation (COPs)** in a **proprietary** fund type account. Refer to Subsection 85.72.40.c.

An agency operating in a proprietary fund type account acquires a piece of equipment for \$10,000, and finances it through a COP. (The actual par value of the COP is slightly higher to cover issue costs, such as Cost of Issuance (COI), Original Issue Discount (OID) and Underwriter's Discount (UD). The COI is always included in the proceeds received by OST, but not the OID or the UD. OST recovers the COI, OID, and UD from agencies by factoring these costs into the interest portion of the agency repayment schedule. Refer to Subsection 85.85.45. Terms of the COP require first year debt service in the amount of \$2,000 principal and \$600 interest, and a second year principal payment of \$2,200.

While agency entries differ if the equipment is acquired by a governmental or proprietary fund type account, the OST entries are the same.

All of these entries are made in the agency's **Operating Account**:

85.85.45.b.(1)

To record the purchase of equipment, the COP liability, and the receipt of COP proceeds from OST. When the COP is sold by OST, it becomes an obligation (liability) of the agency, even if the proceeds have not yet been received by the agency. 85.85.45.c **OFFICE OF THE STATE TREASURER (AGENCY 010) ENTRIES**

Using the same example as in Subsection 85.85.45 above, an agency purchases a piece of equipment for \$10,000, and finances it through a COP. Terms of the COP require first year debt service in the amount of \$2,000 principal and \$600 interest, and a second year principal payment of \$2,200. An additional consideration for OST is to increase the COP issue Par to cover the original issue discount (OID), the underwriter's discount (UD), and costs of issuance (COI). In this example, the OID is \$10, the UD is \$50 and the COI are \$75. The COI is included in the proceeds but not the OID or the UD. OST recovers the OID, UD, and the COI from agencies by factoring these costs into the interest portion of the agency repayment schedule.

While agency entries differ if the equipment is acquired by a governmental or proprietary fund type account, the OST entries are the same.

Real Estate Certificates of Participation

The following example is used to illustrate entries for **real estate project certificates of participation (COP)** in a **governmental** fund type account. Refer to Subsection 85.72.40.d.

An agency operating from a governmental fund type account obtains proper legislative approval for a real estate project and applies to the Office of the State Treasurer (OST) for COP financing. OST sells a \$75 million COP (par) for purposes of constructing a state office building. Of the issue, \$60 million is received as cash by OST and is available to pay for construction costs, and \$14 million is received as cash by OST and is for capitalized interest due during the construction period. The balance of the issue is comprised of the following: \$.7 million is the original issue discount (OID), \$.2 million is the underwriter's discount (UD), and \$.1 million is for other costs of issuance (COI). OST receives cash proceeds for the COI, but not for the UD and the OID. Ten million dollars is expended on construction in the first year. Debt service requirement for the first year is \$4 million, interest only. Unspent construction funds earn \$.8 million in interest revenue by the end of the first fiscal year. (NOTE: In enterprise and trust funds, net construction period interest is to be capitalized, if material.)

Unspent proceeds are held by OST and invested with a trustee or in the LGIP (Local Government Investment Pool).

While agency entries differ if the construction is accounted for in a governmental or proprietary fund type account, OST entries are the same.

85.85.50.a **GOVERNMENTAL FUND TYPE ACCOUNTS (Agency Entries)**

85.85.50.a.(1) **To record the liability for the real estate project COP and the expense of the costs of issuance, original issue discount, and underwriter's discount (paid by OST).** When the COP is sold by OST, it becomes an obligation (liability) of the agency, even if the proceeds have not yet been received by the agency. The time period between the COP sale date and the closing date is two weeks or less.

PROPRIETARY FUND TYPE ACCOUNTS (Agency Entries)

The following example is used to illustrate entries for **real estate project** certificates of participation (COP) in a **proprietary** fund type account. Refer to Subsection 85.72.40.c.

An agency operating from a proprietary fund type account obtains proper legislative approval for a real estate project and applies to the Office of the State Treasurer (OST) for COP financing. OST sells a \$75 million COP (par) for purposes of constructing a state office building. Of the issue, \$60 million is received as cash by OST and is available to pay for construction costs, and \$14 million is received as cash by OST and is for capitalized interest due during the construction period. The balance of the issue is comprised of the following: \$.7 million is the original issue discount (OID), \$.2 million is the underwriter's discount (UD), and \$.1 million is for other costs of issuance (COI). OST receives cash proceeds for the COI, but not for the UD and the OID. Ten million dollars is expended on construction in the first year. Debt service requirement for the first year is \$4 million, interest only. Unspent construction funds earn \$.8 million in interest revenue by the end of the first fiscal year. This example assumes that net construction period interest is material and is therefore capitalized, and the original issue discount (OID), the underwriter's discount (UD) and cost of issuance (COI) are immaterial, and therefore expensed. Where the OID, UD and/or COI are material, they should be deferred to GL Codes 1911 and/or 1921, and amortized over the life of the issue.

Unspent proceeds are held by OST and invested with a trustee or in the LGIP (Local Government Investment Pool).

While agency entries differ if the construction is accounted for in a governmental or proprietary fund type account, OST entries are the same.

85.85.50.b.(1)

To record the liability for the real estate project COP and expense of the costs of issuance, original issue discount, and underwriter’s discount (paid by OST). When the COP is sold by OST, it becomes an obligation (liability) of the agency, even if the proceeds have not yet been received by the agency. The time period between the COP sale date and the closing date is two weeks or less.

Agency Operating/Construction Account:

Expense Adjustment/Elimination (6525)		1 mil
Subobject PC – Other Debt Services (<i>UD, OID and COI</i>)		

Note: Because interest only is due during the construction period, the entire obligation is initially coded long-term.

85.85.50.b.(2)

To record construction expenditures and reimbursement by OST.

Cash in Bank (1110) or In-Process (71XX)		10 mil
Cash in Bank (1110) or In-Process (71XX)	10 mil	
Due from Other Agency-OST (1354)		10 mil

85.85.50.b.(3) **To record interest earned on unspent proceeds and capitalized interest held by the trustee and reported to the agency monthly by OST.** This entry effectively “nets” interest earnings on unspent proceeds against the construction period interest costs that are capitalized.

Agency Operating/Construction Account:

	Dr.	Cr.
Due from Other Agency-OST (1354)	.8 mil	
Construction in Progress (2510)		.8 mil

85.85.50.b.(4) **To record first year interest only debt service payment – this payment is made by OST from the capitalized interest proceeds.**

Agency Operating/Construction Account:

	Dr.	Cr.
Construction in Progress (2510)	4 mil

Once the capitalized interest proceeds are expended, the interest payments will involve a credit to Cash in Bank (1110) or In-Process (71XX). Additionally, once construction is completed, the interest payment is charged to interest expense in GL Code 6510 Cash Expenditures and Subobject PE - Interest COP Lease-Purchase Agreements. Refer to Subsection 85.85.50.b.(5).

85.85.50.b.(5) **At fiscal year-end for reporting purposes, to reclassify as short-term that portion of principal due within the next fiscal year.** At fiscal year-end, the amount in GL Code 5173 should be the same as the next year’s principal payment on the agency’s COP amortization schedule.

Agency Operating/Construction Account:

	Dr.	Cr.
Certificates of Participation Payable (5273)	2 mil	
Certificates of Participation Payable (5173)		2 mil

Note: At each fiscal year-end, interest due on the COP since the last payment should be credited to Interest Payable GL 5112.

85.85.50.b.(6) **In a subsequent period, assume debt service payment is scheduled for principal amount of \$2 million and interest expense of \$3.5 million for total COP debt payment of \$5.5 million.** Part of this \$5.5 million payment (\$2 million) is made by OST from the capitalized interest held by OST, and part of the payment is made by OST from the \$1.1 million of interest earned on funds held by trustee (as reported to agency monthly by OST).

The balance of the payment, \$2.4 million, is paid in cash by the agency to OST. OST then makes the full payment of \$5.5 million to the fiscal agent. Refer to Subsection 85.85.50.c.(6).

OST sells a \$75 million COP (par) for purposes of constructing a state office building. Of the issue, \$60 million is received as cash by OST and is available to pay for construction costs, and \$14 million is received as cash by OST and is for capitalized interest (interest due during the construction period).
