Rationale for Approving Exception

- 600 This position is critical to ensuring that the sensitive information that DRS processes is protected across its full life-cycle, that state privacy requirements are met, and that compliance can be demonstrated.
- 600 The Processing Center plays a critical role in delivering timely and accurate retirement services, and the recent, unplanned retirement of a Customer Service Manager (CSM) creates a significant leadership gap during our busiest season. Given the complexity of the work, the number of staff requiring supervision and training, and the risk of service delays and escalations, approving this exception is essential to maintaining operational stability and customer satisfaction.
