**ASSUMPTIONS:**
- Approximately 7,000 taxpayers pay Washington capital gains tax for taxes due in 2023.
- The tax takes effect on January 1, 2022, and the first payments are due on or about April 17, 2023.
- Because we do not have federal tax return data on nonresident individuals, this fiscal estimate assumes that the long-term net capital gains reported on Washington residents’ federal tax returns are equivalent to the Washington capital gains for all taxpayers, including nonresidents.
- Taxpayers may only consider losses allocated to the state under Section 11 when calculating their adjusted capital gains and Washington capital gains. Losses not allocated to the state under Section 11 cannot be used to reduce a taxpayer’s adjusted capital gains. Limiting available losses to losses allocated to the state would have a minimal but positive impact on revenues. For the purpose of this estimate, we assume the impact is zero due to a lack of information about how gains and losses are allocated to the state in the data available.
- Decoupling the Federal Opportunity Zone program from the Washington capital gains tax will have a minimal but positive impact on revenues.
- Determining federal net long-term capital gains as if the alternative minimum tax did not exist will have a minimal but indeterminate impact on revenues.
- No estimated payments or withholdings are made during the year.
- For all asset types excluded from the tax, the percentage of a taxpayer’s gains resulting from sales or exchanges of these assets aligns with percentages reported in IRS.
This ten-year analysis is limited to agency estimated cash receipts associated with the proposed tax or fee increases. The Office of Financial Management ten-year projection can be found at http://www.ofm.wa.gov/tax/default.asp.

### Narrative Explanation (Required for Indeterminate Cash Receipts)

**SOI statistical tables for all taxpayers nationwide.**

- Future amounts of capital gains for taxpayers equal the amounts reported in 2018 tax returns, adjusted by using forecasted rates of growth and decay.
- The ratio of the out-of-state credit to gross tax is the same for Tax Years 2017 and 2018.
- Compliance is 85 percent in the first year, 90 percent in the second year, and 95 percent thereafter.

For the purpose of the entity interest sale or exchange exemption under Section 6 (2), we estimate the amount of corporate stock capital gains exempted using the following assumptions:

- 87 percent of corporate stock capital gains are associated with privately held firms.
- 89 percent of depreciable business assets held by C-corporations consists of real estate.
- The types of assets sold or exchanged for capital gains align with the types of assets held by all U.S. C-corporations for Tax Year 2013, and capital gains resulting from such exchanges are proportional to the assets sold or exchanged, across all types of assets. For instance, if 16 percent of C-corporation assets are real property, then 16 percent of corporate stock capital gains result from the sale or exchange of real property.

For the purpose of estimating the amount of pass-through capital gains exempted, we assume:

- The types of assets sold or exchanged for capital gains align with the types of assets held by all U.S. S-corporations and partnerships for Tax Year 2014, and capital gains resulting from such exchanges are proportional to the assets sold or exchanged, across all types of assets.
- Sales or exchanges from 89 percent of depreciable business assets consists of real estate improvements.
- Sales or exchanges from all real estate held by these entities are exempt.

Due to a lack of available information about the amount of goodwill associated with sales of franchised auto dealerships, we assume the amount of goodwill associated with the sale of a franchised auto dealership is:

- For pass-through capital gains, the amount of amortizable intangible assets held by businesses in the "Motor vehicle dealers and parts dealers" sector, and
- For "Other Assets" sold or exchanged for capital gains, we assume that 51 percent of sales or exchanges of such assets are exempt, rather than 50 percent. The Other Assets category is in IRS table 2A, listed in the Data Sources section.

For the purpose of estimating the amount of the qualified family-owned small business deduction, we assume:

- All Washington firms with $10 million or less in annual gross revenue will qualify as a qualified family-owned small business. To the extent that capital gains are derived from either (1) the sale of substantially all of the fair market value of the assets of a qualified family-owned small business, or (2) the sale of substantially all of a taxpayer’s qualifying interest in a qualified family-owned small business, the capital gains from such a sale will qualify for a deduction.
- The percentage of all capital gains qualifying for the qualified family-owned small business deduction remains constant year-to-year. This assumption has the same rever

**Narrative Explanation (Required for Indeterminate Cash Receipts)**

impact as annually inflating the gross revenue limitation would have.

For the purpose of estimating the amount of the charitable donations deduction, we assume:
- Current charitable contribution levels reported for federal income tax purposes remain constant. If charitable contribution amounts increase after the capital gains tax goes into effect, the revenues estimated will decrease.
- All charitable contributions reported for federal income tax purposes qualify for the charitable donations deduction in this legislation.

B&O tax credit:
- Each taxpayer maximizes the amount of the credit by applying the standard exemption first to gains realized from personal sources, then applying any remainder to gains from business sources.
- 10 percent of taxable capital gains resulting from business activity in the finance sector is not subject to the B&O tax, because it comes from private equity firms and hedge funds, which qualify for the investment income deduction against the B&O tax.
- The Financial Institutions Surtax for the B&O tax remains in effect.

**DATA SOURCES:**
- Internal Revenue Service (IRS) - Individual income tax returns data, Tax Years 2017 and 2018.
- IRS Statistics of Income: Table 3. All Partnerships: Balance Sheets by Industrial Group, Tax Year 2016.
- IRS Statistics of Income: Table 5. Partnerships with Income (or Loss) Allocated to Partners, by Selected Industrial Group, Tax Year 2014.
- Department of Revenue: Excise tax data, Calendar Year 2020, Q2, used to estimate effective B&O tax rates for finance sector firms.
- Department of Revenue: Excise tax data, Fiscal Year 2018, used to estimate percentage of gross revenues that come from small businesses.
- Personal Income Forecast (November 2020). This includes:
  - The U.S. Congressional Budget Office: Capital gains realizations forecast (all states), August 2020, used to grow capital gains amounts.
  - Economic and Revenue Forecast Council, November 2020, Seattle CPI-Urban (U.S. BLS) forecast, used to adjust amounts for inflation.
