Class Rates are developed each year using the claim and hours data for each class from the previous five fiscal years.

Employers pay all the Accident Fund premiums and half the Medical Aid, Stay at Work, and Supplemental Pension Fund premiums.

Employees pay the rest.
Workers’ Compensation Premiums

Class Rates are developed each Summer and communicated to employers in December to be used for the subsequent calendar year.

Experience factors are based on the employers’ claims and hours data from the previous three fiscal years.

In FY 2021 the total premium paid by employers for all cabinet agencies was more than $110 Million.

$$\text{Premium} = \text{Experience Factor} \times \sum (\text{Hours}_{\text{Class}} \times \text{Rate}_{\text{Class}}) \quad + \quad \text{SPF Rate} \times \sum (\text{Hours}_{\text{Class}})$$
How You Can Lower Your WC Costs

- Injury prevention: Safety Culture

- If injury does occur, prompt healing, Stay at Work, Preferred Worker, Return to Work, and Vocational Rehabilitation Programs help reduce workers compensation costs.

- Experience rating lowers FUTURE premiums for better than average past experience, while Retrospective Rating shares savings from better than expected PAST experience.

- State Agencies’ under-represented in the stay-at-work and retro programs.
Primary Employer Responsibilities per WISHA
