# Gov. Jay Inslee's proposed Climate Commitment Act investments to benefit overburdened communities and Tribes

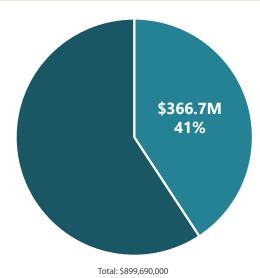

December 2023

The Climate Commitment Act (CCA) sets a declining cap on greenhouse gas emissions and requires the state's largest emitters to purchase allowances for their planet-warming pollution. The law requires the Legislature to invest revenue from this cap-and-invest program to reduce emissions and create jobs, including in clean buildings and transportation, and improve community resiliency in the face of climate change.

The CCA centers environmental justice and equity, ensuring communities that bear the greatest burdens from climate change and pollution today see cleaner, healthier air and water as the state cuts emissions. Specifically, the CCA requires that no less than 35% of annual investments — with a goal of 40% — must provide direct and meaningful benefits to vulnerable populations in overburdened communities. The act also requires that no less

than 10% of CCA investments are supported by a Tribal resolution.

The governor's 2024 supplemental budget achieves these requirements by directly investing in programs and projects that benefit overburdened communities and Tribes. Across the 2024 operating, capital and transportation supplemental budgets, the governor invests nearly \$900 million of CCA revenue. Of that total, we estimate that nearly \$367 million, or 41%, will benefit vulnerable populations in overburdened communities. Nearly \$23 million is directed explicitly to Tribes, with an additional \$80.5 million invested in salmon restoration programs and projects that are important to protect Tribes' culture and respect treaty rights. Tribes are also eligible recipients of most of the programs that make up the nearly \$367 million invested in overburdened communities.

41% of CCA investments in Gov. Inslee's 2024 supplemental budgets will benefit vulnerable populations in overburdened communities.

Office of Financial Management Page 1 of 9

The governor's budget was informed by funding recommendations from the Environmental Justice Council. Additionally, in response to input from community groups for increased transparency, many appropriations in the budget include specific proviso language that prioritizes and benefits overburdened communities.

These investments also add to historic investments in overburdened communities made in the 2023 -25 biennial budget. Across the 2023-25 operating, capital, and transportation biennial budgets, the Legislature invested nearly \$924 million in overburdened communities, comprising 43% of total CCA investments. It also included more than \$155 million explicitly to Tribes and an additional \$142 million invested in salmon restoration programs and projects that are important to Tribes to protect their culture and respect treaty rights.

The Governor's Office, Office of Financial Management (OFM) and cabinet agencies are committed to ensuring that CCA revenues are invested in overburdened communities and Tribes. We will continue to work with the Legislature, Environmental Justice Council, and community representatives to ensure these commitments remain upheld.

### Invest in overburdened communities

Gov. Inslee's proposed 2024 operating, capital, and transportation supplemental budgets invest nearly \$367 million of CCA revenue in creating meaningful benefits for vulnerable populations in overburdened communities. Some of the major investments specifically for overburdened communities in the operating and capital budgets include the following.

Note that some of these programs are not directed *entirely* to benefit overburdened communities. The dollar figures shown below

reflect the minimum amount we expect to be invested to benefit these communities.

- \$90 million for the Department of Commerce to expand the Clean Energy Fund. This includes a Clean Communities program to develop community-driven, neighborhood-scale sustainability projects. State 'clean energy ambassadors' will assist government and community leaders of vulnerable and overburdened communities to develop and implement these projects.
- \$90 million for the Department of Commerce to provide low- and moderateincome Washingtonians in overburdened communities with a one-time \$200 credit on residential electricity bills. This will help offset the cost of rising oil and gas prices.
- \$75 million to improve home energy efficiency and indoor air quality in affordable multifamily housing located in overburdened communities by undertaking benchmarking, energy management, operations and maintenance planning, retrofits, energy efficiency upgrades and installing high-efficiency electric appliances, equipment and heat pumps.
- \$25 million to incentivize the transition from diesel school buses and other student transport vehicles operating in overburdened communities to electric. This includes building out the necessary charging infrastructure for zero emissions student transportation.
- \$16 million to improve air quality in schools located in overburdened communities. Funding will provide grants to school districts to replace deteriorating heating, ventilation and air conditioning (HVAC) systems, and undertake energy

Office of Financial Management Page 2 of 9

efficiency upgrades, air filtration enhancements and general air quality improvements. These efforts will make it easier for children to learn safely and comfortably.

- \$16 million for state matching funds for competitive federal funding opportunities that benefit vulnerable populations in overburdened communities.
- \$1 million to the Department of Social and Health Services to facilitate public assemblies, which community-based organizations host. These will elevate community solutions and expertise on funding and policy solutions to transition Washington toward a more equitable and climate-resilient state.
- \$263,000 to build on federal funding for the University of Washington Thriving Communities Technical Assistance Center. This funding will help overburdened communities and tribes access state and federal funding dedicated to advancing environmental justice.
- \$253,000 for the Department of Commerce to incorporate equity and environmental justice into agency grant programs by reducing programmatic barriers to accessing grants.
- \$150,000 to pilot Health Equity Zones for community-selected advisory committees to identify priorities and interventions to reduce health disparities at the local level.
- \$1.17 million to support the state's implementation of the Healthy Environment for All (HEAL) Act by adding capacity to the Environmental Justice Council and Department of Health.
- \$900,000 for the Department of Transportation to conduct research

- recommended in the 2023 Frequent Transit Service study. This includes identifying ways to achieve more accurate and precise analysis of disparities in how people access public transit.
- Direct the Department of Transportation to use its existing funding for the Commercial Aviation Work Group. This group will conduct meaningful community engagement with overburdened and vulnerable populations to address the state's transportation needs and the environmental justice impact of aviation in communities.

### Invest to benefit Tribes

The proposed 2024 budgets designate nearly \$23 million of CCA funding explicitly to Tribes. Tribal communities are also eligible to apply for other CCA-funded programs. The governor proposes an additional \$80.5 million of CCA revenues in salmon restoration programs and projects that are important to Tribes to protect their culture and respect treaty rights.

These investments build upon funding in the 2023-2025 biennial budgets, where the Legislature invested nearly \$155 million explicitly to Tribes and an additional \$142 million for salmon and other tribal priorities.

The CCA requires that at least 10% of CCA investments are supported by a Tribal resolution (RCW 70A.65.230(10(b)). It is anticipated that tribes will ultimately receive and/or formally support more than 10% of total CCA appropriations. The Governor's Office and OFM will work with agencies to track progress on meeting this requirement.

Significant CCA investments designated specifically for Tribes include:

 \$10 million in capacity funding to Tribes to support them as they mitigate and adapt

Office of Financial Management Page 3 of 9

to the effects of climate change. This adds to \$16 million appropriated in the 2023-25 biennial budgets and expands the purposes for how the funds may be used.

- \$5 million to provide federally recognized
   Tribes with grants to purchase electric
   boats and motors, enabling continued
   cultural and fishing practices while
   reducing greenhouse gas emissions.
- \$4 million for the Nisqually Tribe to begin designing and developing a microgrid system to power the Tribe's facilities and help them move toward energy sovereignty.
- \$2 million for a Tribal clean energy innovation and training center, in partnership with Northwest Indian College.

Examples of significant CCA investments important to Tribes to protect their culture and respect treaty rights include:

- \$58 million to grants for salmon recovery projects, administered through the Salmon Recovery Funding Board, the Puget Sound Restoration and Protection program, and the Brian Abbot Fish Passage Barrier Board.
- \$15 million for the Department of Transportation to install stormwater retrofits to reduce pollution in stormwater. This will improve water quality and protect coho salmon and other aquatic species.

# Maintain accountability

The accompanying table identifies each CCA investment proposed in the governor's supplemental budgets and shows which investments contribute to meeting the equity

requirements. Many of these investments include proviso language that either require direct investment in overburdened communities or require that the agency prioritize funding to benefit these communities. The CCA requires the Department of Ecology to track and report on all CCA funding. This includes the purpose of funding, who receives the funding, and any attributable greenhouse gas emission reductions. In addition, the 2023-2025 biennial operating budget provided \$640,000 for Ecology (in consultation with OFM and the Environmental Justice Council), to track, summarize and report on all CCA investments in overburdened communities and Tribes. The first report is due to the Legislature September 2024.

OFM also received \$772,000 in the 2023-25 biennial operating budget to work with Ecology on developing a data portal. This portal will aim to improve the public's understanding of CCA account investments. OFM is currently developing the portal and plans to launch it September 2024.

Ecology is developing interim guidance for state agencies so agencies know what information to collect and include in the 2024 and 2025 reports. They have initiated rulemaking that establishes the information must be collected from agencies for the 2026 report.

State agencies that allocate funds or administer grants or programs from these accounts must also annually report their progress on meeting environmental justice and environmental health goals to the Environmental Justice Council (RCW 70A.65.030(3)).

See next page for table of investments.
