

These Voting District estimates were prepared to fulfill a special request. Many of the population estimates are below OFM's recommended threshold of 5,000 people for special area estimates. Use these data with caution.

These 2020 estimates are baselined to 2010 Census data. State-level results from the 2020 Census show that the estimated population for 2020 is 49,081 persons too low.

The Census Bureau has moved to publishing GIS metadata according to the ISO 19115 standard to integrate into the data.gov platform. They are no longer producing FGDC compliant metadata. For more information, please see the TIGER/LINE technical documentation: <https://www.census.gov/programs-surveys/geography/technical-documentation/complete-technical-documentation/tiger-geo-line.2020.html>.

By using these data the user agrees that the Washington State Office of Financial Management shall not be liable for any activity involving these data with regard to lost profit or savings or any other consequential damages; or the fitness for use of the data for a particular purpose; or the installation of the data, its use, or the results obtained.
