The Behavioral Health Administration (BHA) administers systems designed to provide a full range of treatment and rehabilitation services for children and adults with severe and persistent mental illness and serious emotional disturbance. These services are designed to support the Administration’s mission. Community based and short term inpatient mental health services are delivered through a managed care payment and service delivery system contracted to regional entities, all but one of which is county based.

Beginning in April 2016, substance use disorder treatment services were integrated into our mental health managed care contracting system, providing an opportunity to better meet the needs of the people that we serve, many of whom have both mental health and substance use disorders. With the ACA (Affordable Care Act) Medicaid expansion, our goal is to intervene earlier with appropriate, effective treatment and to reduce the need for involuntary commitment and long term hospitalization.

The three state psychiatric hospitals in Washington State—Western State Hospital, Eastern State Hospital and Child Study and Treatment Center—provide long term acute psychiatric care for people in the civil involuntary treatment system and people with mental illness who have been charged with a crime or found not guilty by reason of insanity. State psychiatric hospitals are a critical part of the continuum of mental health services. Their goal is to provide high quality treatment in a safe environment, for both patients and staff. Their performance is monitored through strategic objectives related to clinical services and staff and patient safety.

As a part of the second phase of behavioral health integration, all community mental health and substance use disorder programs are transferred from the Department of Social and Health Services to the Health Care Authority with the exception of the Licensing and Certification Program which is transferred to the Department of Health. These transfers are effective July 1, 2017.

Program Mission

To transform lives by supporting sustainable recovery, independence and wellness.
