## 85.65.36 Long-term loans

June 1, 2011

The following entries illustrate disbursement and repayment for both budgeted and non-budgeted long-term loans. Since the loan in this illustration is made to a private entity, long-term GL Code 1614 "Loans Receivable" is used. However, this example may be applied to other types of long-term loans using other receivable general ledger codes, such as GL Code 1652 "Due from Other Governments." ### 85.65.36.a.(1)

## 85.65.37 Lease receivable and deferred inflows on leases

July 1, 2021

The following example is used to illustrate the entries for leases to an external entity (not a state agency) that exceeds the state's capitalization threshold. Refer to [Subsection 85.72.30](#).

## State Administrative and Accounting Manual

An agency entered into an agreement to lease a building for 10 years at the rate of \$10,000 per month. The current interest rate is 4 percent and the present value of the minimum lease payments is \$990,994 (annuity due). The value of the asset meets the state's capitalization threshold (refer to [Subsection 30.20.20](#)). Therefore, the entries to be recorded for a lease are as follows:

**Note:** Contact the Office of the State Treasurer for the current rate of interest, for computing present value. Leases are computed as annuities due because the payments are made at the first of the month; other capital purchases may be computed as ordinary annuities.

### 85.65.37.a

To record the lease receivable and the deferred inflows of resources at lease commencement. The portion of the receivable due within the next fiscal year should be recorded in GL 1321 and the remaining receivable balance should be recorded in GL 1621.

### 85.65.37.d

The net proceeds received from the sale of general capital assets are generally recorded in the account that originally acquired the asset. Refer to [Subsection 85.60.50.a](#). If the estimated net proceeds from disposition were included in the budget for the acquisition of the replacement capital asset and the expenditure for the acquisition of new capital assets has already been recorded at gross, the following entry is made:

## 85.65.63 Capital assets acquired through public-private and public-public partnerships - transferor accounting

July 1, 2022

---

This section provides common illustrative entries made by the **transferor** in a public-private and public-public partnership (PPP) arrangement under various scenarios. Contact your OFM Statewide Accountant to discuss your specific arrangement.

### 85.65.63.a New asset acquired through PPP that is not a service concession arrangement.

The underlying PPP asset is a new asset purchased or constructed by the operator under an agreement that is not a service concession arrangement (SCA). This example assumes the operator makes an upfront payment at the commencement of the agreement and installment payments throughout the PPP term to the transferor. Ownership of the asset will transfer from the operator to the transferor (state) at the end of the PPP term.

#### 1. Governmental Fund Type Accounts

When the new underlying PPP asset is placed into service, recognize a receivable for the underlying asset measured at the operator's estimated carrying value as of the expected date of ownership transfer; a receivable for the present value of any future PPP installment payments, if any; and a deferred inflow of resources on PPPs. The deferred inflows on PPPs amount should include any prepayments received at or before commencement of the PPP term.

## 85.65.66 Interagency/Interfund Capital Asset Transfers

Jan. 1, 2014

The following entries illustrate how to record the transfer of a capital asset based on the fund type of the accounts involved in the transfer. Refer to [Subsection 85.60.97.b and c](#).

### 85.65.66.a Transfer capital asset from Governmental Fund Type Account to a Proprietary or Fiduciary Fund Type Account

The following entry records the transfer of a capital asset from a governmental fund type account. Because governmental fund type accounts focus on current financial resources, no entry is made in the operating account. However, an entry in Account 997 "General Capital Assets Subsidiary Account" is made to record the removal of the capital asset. In this example, the capital asset was not fully depreciated (i.e. the cost is greater than the accumulated depreciation). If the capital asset was fully depreciated (i.e. the cost and the accumulated depreciation are an equal amount), the entries to GL Code 6597 "Capital Asset

## 85.65.66.b Transfer capital asset from Proprietary or Fiduciary Fund Type Account to a Governmental Fund Type Account

The following entry records the transfer of a capital asset to a governmental fund type account. Because governmental fund type accounts focus on current financial resources, no entry is made in the operating account. However, an entry in Account 997 "General Capital Assets Subsidiary Account" is made to record the addition of the capital asset. In this example, the capital asset was not fully depreciated (i.e. the cost is greater than the accumulated depreciation). If the capital asset was fully depreciated (i.e. the cost and the accumulated depreciation are an equal amount), the entries made to GL Code 9850 "Investment in General Capital Assets" would net to zero, and there would be no gain or loss on the sale of the capital asset recorded in the proprietary or fiduciary fund type account.
