85.85.30 Fund bond debt issuance and servicing

June 1, 2013

The following example is used to illustrate entries for recording the issuance and servicing of fund bond debt in a non-appropriated proprietary account. Generally, these bonds are revenue bonds. Refer to [Subsection 85.72.20.c](#).

An agency issues revenue bonds with:

- Par amount of \$5,000,
- Original issue discount (OID) of \$200,
- Underwriter’s discount (UD) of \$60, and
- Costs of issuance (COI) of \$20.

Details of the bond debt service are:

- 1st year \$500 principal, \$300 interest, and
- 2nd year \$600 principal.

Note: Original issue discount (OID) results when the par of the bond exceeds its purchase price. Original issue premium (OIP) results when the par of the bond is less than the purchase price. If deemed material, OID and OIP are deferred (using GL Codes 1910 “Unamortized Discount on Bonds Sold,” and 5910 “Unamortized Premiums on Bonds Sold” respectively) and amortized over the life of the bonds using GL Code 6512 “Amortization Expense” Subobject WB “Amortization.” Issuance costs, including underwriters’ discounts, are recorded as expenses using GL Code 6510 “Cash Expenditures/Expenses” and appropriate object codes such as C or E or Subobject PC “Other Debt Costs.” If the OIP or OID is deemed immaterial, it should be recorded in the same manner as the other issuance costs. Refer to [Subsection 85.72.20.c](#).

*If the bond had an OIP instead of an OID GL Code 5910 “Unamortized Premiums on Bonds Sold” would be credited and amortized over the life of the bond.

	Dr.	Cr.
Revenue Bonds Payable (5262)	600	
Revenue Bonds Payable (5162)		600

Note: If this were a **budgeted proprietary account**, bond proceeds would be recorded as revenue by a credit to GL Code 3210 "Cash Revenues," Revenue Source Code 0860 "Bonds Issued," and then adjusted for GAAP reporting purposes through GL Code 3225 "Revenue Adjustments/Eliminations (GAAP)," Revenue Source Code 0860 to GL Code 5162 "Revenue Bonds Payable ." Likewise, payments on bond principal would be initially recorded as expenditure by a debit to GL Code 6510 Subobject PA "Principal," and then adjusted for financial reporting purposes through GL Code 6525 "Expense Adjustments/Eliminations (GAAP)," Subobject PA to GL Code 5162.

85.85.35 General obligation bond debt issuance and servicing

Jan. 1, 2011

The following example is used to illustrate entries for recording the issuance and servicing of general bond debt:

- Par amount of \$5,000,
- Original issue premium (OIP) of \$200,
- Underwriter’s discount (UD) of \$60, and
- Costs of issuance (COI) of \$20.

Details of the bond debt service are:

- 1st year \$500 principal, \$300 interest, and
- 2nd year \$600 principal.

Note: Discounts that are related to underwriters’ fees are handled consistent with other issue costs. Original issue discount (OID) results when the par of the bond exceeds its purchase price. Original issue premium (OIP) results when the par of the bond is less than the purchase price. Costs of issuance (COI) are generally included in the proceeds and paid separately. Refer to [Subsection 85.72.20.c](#).

For purposes of this example, proceeds of the debt issue will be used to build a facility to house a general governmental agency. The COI for general obligation bond debt sold by the Office of the State Treasurer (OST) are always included in the proceeds and paid separately by OST.

85.85.37 Right-to-use lease agreements and subscription-based IT arrangements

July 1, 2022

85.85.37.a Governmental Fund Type Accounts

The following example is used to illustrate the entries for leased assets and subscription-based information technology arrangements (SBITAs) that meet the capitalization threshold in a governmental fund type account. Refer to [Subsections 85.60.65](#) and [85.72.25](#).

An agency operating from a governmental fund type account entered into an agreement to lease a building for 60 months at the rate of \$95,000 per month that are due on the first of each month. The current interest rate is 3 percent and the present value of the lease payments is \$5,300,200. Since this lease meets the state's capitalization threshold, a lease liability and an intangible right-to-use asset must be recorded (refer to [Subsection 30.20.30](#) for further information on capitalization criteria for leases). Therefore, the entries to be recorded are as follows:

85.85.37.a.(1)

To record the acquisition of an intangible right-to-use lease asset in the Operating Account equal to the value of the lease liability, and the lease asset and liability in the capital asset and long-term obligations subsidiary accounts.

85.85.37.b Proprietary and Fiduciary Fund Type Accounts

The following example is used to illustrate the entries for leased assets and subscription-based information technology arrangements (SBITAs) in proprietary and fiduciary fund type accounts. Refer to [Subsections 85.60.65](#) and [85.72.25](#).

An agency operating from a proprietary fund type account entered into an agreement to lease a building for 60 months at the rate of \$95,000 per month that are due on the first of each month. The current interest rate is 3 percent and the present value of the lease payments is \$5,300,200. Since this lease meets the state's capitalization threshold, a lease liability and an intangible right-to-use asset must be recorded (refer to [Subsection 30.20.30](#) for further information on capitalization criteria for leases). Therefore, the entries to be recorded are as follows:

85.85.37.b.(1)

To record the acquisition of an intangible right-to-use lease asset and the lease liability. The current lease liability represents that portion of the principal due within one year and the long-term portion of the lease liability that will be paid thereafter.

Cash in Bank (1110) or In-Process (71XX)		95,000

Note: Nonbudgeted proprietary and fiduciary fund type accounts could directly reduce the lease liability and record an expense for the portion related to interest.

85.85.37.b.(3)

At year-end, to reclassify the payments to the portions allocated to principal and interest based on the lease liability amortization schedule. The portion related to principal reduces the lease liability and the portion related to interest is recorded as a lease interest expense.

85.85.40 Lease-to-own agreements

July 1, 2021

85.85.40.a

Governmental Fund Type Accounts

The following example is used to illustrate the entries to record a lease-to-own agreement in a governmental fund type account. Refer to [Subsection 85.72.30](#).

An agency operating from the General Fund (governmental fund type account) entered into an agreement to lease a copy machine with a fair value of \$17,000 for 60 months at the rate of \$300 per month. The current interest rate is 4 percent and the present value of the minimum lease payments is \$16,344 (annuity due). Since the value of the asset meets the state’s capitalization threshold, this lease-to-own agreement must be capitalized (refer to [Subsection 30.20.30](#) for further information on capitalization criteria). The amount to be capitalized is \$16,344, which is the lesser of the fair value and the net present value. Therefore, the entries to be recorded are as follows:

85.85.40.a.(1)

To record the acquisition of a capital asset through a lease-to-own agreement in the Operating Account, and the asset and lease liability in the capital asset and long-term obligations subsidiary accounts.

85.85.40.b Proprietary and Fiduciary Fund Type Accounts

The following example is used to illustrate the entries to record a lease-to-own agreement in proprietary and fiduciary fund type accounts. Refer to [Subsection 85.72.30](#).

An agency operating from a proprietary fund type account entered into an agreement to lease a copy machine with a fair value of \$17,000 for 60 months at the rate of \$300 per month. The current interest rate is 4 percent and the present value of the minimum lease payments is \$16,344 (annuity due). Since the value of the asset meets the state’s capitalization threshold, this lease-to-own agreement must be capitalized (refer to [Subsection 30.20.30](#) for further information on capitalization criteria). The amount to be capitalized is \$16,344, which is the lesser of the fair value and the net present value. Therefore, the entries to be recorded are as follows:

85.85.40.b.(1)

To record the acquisition of a capital asset through a lease-to-own agreement and the lease liability. The current lease liability represents that portion of the lease obligation due within one year and the long-term portion represents lease obligations maturing thereafter.

85.85.40.c Computation of Present Value Annuities

Any annuity is a series of equal payments made at regular intervals of time. The time intervals between payments are called payment periods. An annuity is a compound interest situation with periodic payments. When the payments are made at the end of the payment periods, the annuity is called an ordinary annuity. When the payments are made at the beginning of the payment periods, the annuity is called an annuity due.

Computation of present value may be achieved by use of the following formulas:

Where:

Pv = present value factor

I = interest rate

n = number of periods

Ordinary Annuity/Present Value Formula - A loan is a prime example of this annuity situation in which a sum of money is to be repaid with interest by certain payments for a fixed number of periods. The present value of the loan can be computed by multiplying the periodic loan payments by the present value factor. The present value factor is calculated by using the following formula:

$$Pv = \frac{1}{i} - \frac{(1+i)^n}{i}$$

Annuity Due/Present Value Formula - Rent or lease situations are common examples of this type of annuity. The present value of the rent or lease can be computed by multiplying the periodic rent/lease payments by the present value factor. The present value factor is calculated by using the following formula:

(However, the formula need not be used, since tables showing present values computed with the formula at various interest rates are readily available.)

$$Pv = \frac{1}{i} - \frac{(1+i)^n}{i} \quad \text{and adding 1 to the computed amount}$$

85.85.45.a Governmental Fund Type Accounts (Agency Entries)

The following example is used to illustrate entries for **equipment certificates of participation (COP)** in a **governmental** fund type account. Refer to [Subsection 85.72.40.c](#).

An agency operating in a governmental fund type account purchases a piece of equipment for \$10,000, and finances it with a COP.

Details of the COP issue are:

- Par amount of \$10,115,
- Original issue premium (OIP) of \$10,
- Underwriter's discount (UD) of \$50, and
- Costs of issuance (COI) of \$75.

Details of the COP debt service are:

- 1st year \$2,000 principal, \$600 interest, and
- 2nd year \$2,200 principal.

State Administrative and Accounting Manual

Note: The actual par value of the COP is slightly higher than the proceeds required by the agency to cover issue costs, such as costs of issuance (COI) and the original issue discount (OID) and underwriter’s discount (UD). The OID, results when the par of the COP is more than the purchase price. Original issue premium (OIP) results when the par of the COP is less than the purchase price. Discounts that are related to underwriters’ fees are handled consistent with other issue costs. COI are generally included in the proceeds and paid separately by OST. OST provides agencies with a statement detailing this information. The agency is to include the financing costs as part of the cost of the asset that is capitalized and depreciated.

85.85.45.a.(1)

To record the COP liability, original issue discount, underwriter’s discount, and the expense of the costs of issuance (paid by OST). Note: If a COP has been authorized and equipment costs are incurred in one fiscal year but the COP is not issued until the subsequent year, agencies should debit a receivable, such as GL Code 1352 "Due from Other Governments," and credit expenditures to GL Code 6510 in the year the equipment costs are initially incurred. When the COP is issued in the subsequent year, the agency should credit the GL Code 1352 and debit cash when the COP proceeds are received, along with a debit to GL Code 6514 Subobject JC with the offsetting credit to GL Code 3221 Revenue Source Code 0807.

85.85.45.b Proprietary and Fiduciary Fund Type Accounts (Agency Entries)

The following example is used to illustrate entries for equipment certificates of participation (COP) in a budgeted proprietary fund type account. Refer to [Subsection 85.72.40.c](#).

An agency operating in a proprietary fund type account purchases a piece of equipment for \$10,000, and finances it with a COP.

- Par amount of \$10,115,
- Original issue premium (OIP) of \$10,
- Underwriter’s discount (UD) of \$50, and
- Costs of issuance (COI) of \$75.

Details of the COP debt service are:

- 1st year \$2,000 principal, \$600 interest, and
- 2nd year \$2,200 principal.

Note: The actual par value of the COP is slightly higher than the proceeds required by the agency to cover issue costs, such as costs of issuance (COI) and original issue discount (OID). OID results when the par of the COP is more than the purchase price. Original issue premium (OIP) results when the par of the COP is less than the purchase price. Discounts that are related to underwriters’ fees are handled consistent with other issue costs. COI are generally included in the proceeds and paid separately by OST. OST provides agencies with a statement detailing this information. The agency is to include the financing costs as part of the cost of the asset that is capitalized and depreciated.

In proprietary fund type accounts COP issue costs, such as COI and UD are expensed using GL Code 6510 “Cash Expenditures/Expenses” Subobject PC “Other Debt Costs.”

If the OID or OIP is deemed material, it should be deferred using GL Code 1911 “Unamortized Discounts on Certificates of Participation” or GL Code 5920 “Unamortized Premiums on Certificates of Participation” respectively. The amount deferred should be amortized over the life of the COP using GL Code 6512 “Amortization Expense” Subobject WB “Amortization.” If the OIP or OID is deemed immaterial, it should be recorded in the same manner as the other issuance costs.

All of these entries are made in the agency’s **Operating Account**:

85.85.50 Real Estate Certificates of Participation (COP)

July 1, 2021

85.85.50.a

Governmental Fund Type Accounts (Agency Entries)

The following example is used to illustrate entries for real estate certificates of participation (COP) in a governmental fund type account. Refer to [Subsection 85.72.40.d](#).

An agency operating in a governmental fund type account obtains proper legislative approval for construction of a new state office building and applies to the Office of the State Treasurer (OST) for COP financing. OST sells a COP. Proceeds of the COP are used to pay for construction costs and interest incurred during the construction period.

Details of the COP issue are:

- Par amount of \$73.6 million,
- Original issue premium (OIP) of \$.7 million,
- Underwriter's discount (UD) of \$.2 million,
- Costs of issuance (COI) of \$.1 million,
- COP proceeds for construction \$60 million,
- COP proceeds for interest costs \$14 million, and
- Net COP proceeds held by OST for the agency \$74 million (\$60 million for construction costs and \$14 million for construction period interest).

Note: Original issue discount (OID) results when the par of the COP is more than the purchase price. An OIP results when the par of the COP is less than the purchase price. Discounts that are related to underwriters' fees are handled consistent with other issue costs. COI are generally included in the proceeds and paid separately. OST receives cash proceeds for the COI, but not for the UD and the OID.

Details of the first year:

- \$10 million is expended on construction,
- Debt service is \$4 million, interest only, and
- Unspent construction funds earn \$.8 million in interest revenue.

Unspent proceeds are held by OST and invested in the Local Government Investment Pool (LGIP) or with a trustee.

Note: Construction period interest is recognized as an expense in the period incurred.

85.85.50.a.(1)

To record the liability for the real estate COP, and the original issue premium, underwriter's discount, and the expense of the costs of issuance (paid by OST). When the COP is sold by OST, it becomes an obligation (liability) of the agency, even if the cash proceeds have not yet been received by the agency. The time period between the COP sale date and the closing date is generally two weeks or less.

85.85.50.b Proprietary and Fiduciary Fund Type Accounts (Agency Entries)

The following example is used to illustrate entries for **real estate** certificates of participation (COP) in a **budgeted proprietary** fund type account. Refer to [Subsection 85.72.40.c](#).

An agency operating in a budgeted proprietary fund type account obtains proper legislative approval for construction of a new state office building and applies to the Office of the State Treasurer (OST) for COP financing. OST sells a COP. Proceeds of the COP are used for to pay for construction costs and interest incurred during the construction period.

Details of the issue are:

State Administrative and Accounting Manual

- Par amount of \$73.6 million,
- Original issue premium (OIP) of \$.7 million,
- Underwriter’s discount (UD) of \$.2 million,
- Costs of issuance (COI) of \$.1 million,
- COP proceeds for construction \$60 million,
- COP proceeds for interest costs \$14 million, and
- Net COP proceeds held by OST for the agency \$74 million (\$60 million for construction costs and \$14 million for construction period interest.

Note: Original issue discount (OID) results when the par of the COP is more than the purchase price. An OIP results when the par of the COP is less than the purchase price. Discounts that are related to underwriters’ fees are handled consistent with other issue costs. COI are generally included in the proceeds and paid separately. OST receives cash proceeds for the COI, but not for the UD and the OID.

Details of the first year:

- \$10 million is expended on construction,
- Debt service is \$4 million, interest only, and
- Unspent COP proceeds earn \$.8 million in interest revenue.

This example assumes that net construction period interest is material and is therefore capitalized, and that the OIP is immaterial, and therefore expensed. UD and COI are always expensed as issuance costs. (If the OIP had been deemed material, it would be deferred in GL Code 5920 “Unamortized Premiums on Certificates of Participation” and amortized over the life of the COP using GL Code 6512 “Amortization Expense” Subobject WB “Amortization”).

Unspent proceeds are held by OST and invested in the Local Government Investment Pool (LGIP) or with a trustee.

Note: Construction period interest is recognized as an expense in the period incurred.

85.85.50.b.(1)

To record the liability for the real estate COP, and the original issue premium, underwriter’s discount, and the expense of the costs of issuance (paid by OST). When the COP is sold by OST, it becomes an obligation (liability) of the agency, even if the cash proceeds have not yet been received by the agency. The time period between the COP sale date and the closing date is generally two weeks or less.

Agency Operating/Construction Account:

	Dr.	Cr.
Due from Other Agency-OST (1354)	74 mil	
Cash Expenditures/Expenses (6510) Subobject PC – Other Debt Costs (<i>UD + COI - OIP</i>)*		.4 mil
Certificates of Participation Payable (5273) (<i>Par</i>)		73.6 mil

*If the COP had an OID instead of an OIP, the OID amount would be added to the UD and COI.

State Administrative and Accounting Manual

Note: Because interest only is due during the construction period, the entire obligation is initially coded long-term.

85.85.50.b.(2)

To record construction expenditures, reimbursement by OST, and elimination of budgeted expenditures.

The following example is used to illustrate entries for an **advance refunding** of a real estate certificate of participation (COP) in a governmental fund type account. Refer to [Section 85.72.40.f](#).

Details of the old (refunded) COP are:

- Principal balance \$250,000, and
- Interest due \$1,400

Details of the new (refunding) COP are:

- Principal balance \$239,000,
- Original issue premium (OIP) \$15,000,

85.85.52.a.(1)

To record the liability for the new (refunding) COP, the original issue premium, underwriter's discount, and the expense of the costs of issuance (paid by OST), and the payment to the escrow agent bank. When the new COP is sold by OST, it becomes an obligation of the agency. An amount equal to the principal balance of the old (refunded) COP plus any interest due is sent to the escrow agent bank to refund the old

State Administrative and Accounting Manual

COPs. When the old COP is refunded, it is no longer an obligation of the agency and it is removed from Account 999.

Operating Account:

	Dr.	Cr.
Cash Revenue (3210) Revenue Source Code (0850) Payments to Refunded COP Escrow Agents (par of old COPs + interest due on the old COPs)**	251,400	
Cash Revenue (3210) Revenue Source Code (0852) Underwriter's Discount/Costs of Issuance – Refunding COPs	2,600

Cash Revenue (3210) Revenue Source Code (0853) Original Issue Premium – Refunding COPs*		15,000

*If the COP had an Original Issue Discount (OID) instead of an OIP, Revenue Source Code 0851 "Original Issue Discount – Refunding COPs" would be debited.

If this was a **current refunding of a COP (instead of an advance refunding), the amount to be paid to the escrow agent would be recorded as an expenditure to subobject PA "Principal" and/or PB "Interest."
