

On April 3 Governor Inslee signed the [supplemental budget bill](#) which provides \$20.065 million to the One Washington program. This funding will help the program begin to replace the Agency Financial Reporting System, the state's finance system, with an Enterprise Resource Planning system.

In early fiscal year 2021, One Washington will begin to work with a system integrator to implement the new ERP system and replace AFRS. Initial finance go-live is scheduled for early fiscal year 2023 with additional functionality (procurement, HR/payroll, and budget) following in subsequent biennia. This funding will also allow the program to continue critical agency readiness activities to better prepare state employees for the transition to the new ERP system.

We appreciate the support of Governor Inslee and the Legislature in funding One Washington.

The [Modernization Roadmap](#) contains additional details related to the One Washington project timeline. Please send any questions, comments, or feedback to [onewa@ofm.wa.gov](mailto:onewa@ofm.wa.gov).
