# Central Service Model Report

Enacted

2025-27 Biennial Budget

**Budget Division**

Office of Financial Management

May 2025

## Overview

The central service model is a budget tool to distribute costs of specific items funded within a central service agency. Many central service agencies have funding sources outside of the central service model. This report is intended to inform agencies about the specific items that affected the central service model within the enacted budget.

### Notable updates within this proposed budget:

- 92RC – OFM Central Services FY Correction:
  - This item corrects the funding that was erroneously shifted from FY1 to FY2 in the enacted 2024 supplemental budget.
- All services are rebased each biennium according to updated allocation splits. Allocation splits are based on the central service methodology. Allocation splits come from statewide data in the Agency Financial Reporting System (AFRS) or submitted by the central service agency.
- The methodologies for the following central services were updated:

Service	Current Methodology	Proposed Methodology
Department of Enterprise Services (DES) – Security on Campus	Ratio of Thurston County full-time equivalents (FTEs) and occupied square footage	Agency percentage of Thurston County FTEs
DES – Campus Contracts	Ratio of Thurston County full-time equivalents (FTEs) and occupied square footage	Agency occupied square footage in DES Managed buildings
Washington Technology Solutions (WTS) – Geographic Information Systems (GIS)	Weighted index of agency usage by IP address, FTE usage survey, agency GIS investment survey, and agency size	FTE percentage of agencies using service.

### For additional information about the central service model:
